

# pextra Guard break secure cylinder lock from dormakaba

Kitemark approved  
TS007 3-Star

Meets class 6 security  
standard EN 1303.

dormakaba 

### **What is the TS007 Kitemark?\***

To effectively protect your door, the Door & Hardware Federation in the UK (DHF) advises that the lock cylinder and door handles on external entrance doors should meet the highest standard, and protect against all the latest forms of attack. The DHF advises home and business owners that their lock cylinders should be upgraded to the TS007 Kitemark standard.

Secured by Design (the Association of Chief Police Officer's crime prevention initiative) has worked with the DHF and the Glass & Glazing Federation (GGF) to develop the TS007 standard.

# Introducing the new dormakaba pextra Guard door cylinder lock

dormakaba's new innovative snap  
secure door lock cylinder meets the  
TS007, British Kitemark approved,  
3-Star standard.

dormakaba is proud to showcase its new pextra  
Guard - a cylinder that protects your door from all  
common types of attack:

- Drilling
- Picking
- Bumping
- Snapping
- Plug extraction.

pextra Guard has been developed specifically to  
meet the TS007 3-Star standard for lock cylinders  
and has undergone rigorous testing prior to its full  
approval to the new standard.

To provide a counter measure to, amongst others,  
the increasing threat of snapping locks, the cylinder  
itself features several layers of protection. In  
particular, the cylinder features a sacrificial break  
slot, which ensures that in the event of the cylinder  
being snapped, the secure core of the lock is  
retained within the door preventing forced override  
of the cylinder.

dormakaba's new pextra Guard expands the range and follows dormakaba's high quality product line into a new generation cylinder, benefiting from several layers of protection built-in to keep the most determined of burglars at bay having undergone rigorous testing prior to its full approval to the new TS007 standard.
